Why VisionLabs Facial Recognition?

Enhanced Fraud Protection

VisionLabs provides financial institutions, retailers and other enterprise sectors with a new era of fraud protection. Unlike our competitors, our liveness model and our unparalleled accuracy (99.9%) ensure that fraudsters cannot spoof the system.

Seamless Customer Experience

VisionLabs' facial recognition technology scans and verifies faces in two milliseconds - providing customers with a faster, more secure processing method than manual options.

Easy System Integration

VisionLabs' vendor-agnostic software easily integrates into any existing enterprise technology or 3rd-party hardware making it suitable for a vast array of commercial applications. For retail and financial services, our LUNA POS Terminal can also be used with 3rd-party software.

Future Proof

VisionLabs' facial recognition is not just for the here and now. Whether it's rapid payment processing, or increasing security whilst increasing efficiency. Implementing facial recognition solutions allows you to future-proof your business.
